LITTLE WONDERS ESL · ANSWER KEY

Biology Word Lab: Animal adaptations

Level B1 · about 25 minutes · surviving in a habitat

1 BRAIN TEASERS: ANSWERS

1. **CAMEL**. A camel is adapted to the desert.
2. **CACTUS**. A cactus stores water in its stems.
3. **MIGRATE**. Birds migrate to a warmer place for the winter.

2 TEACHER NOTE

Correct a common mistake: a camel hump stores fat, not water. Extension: students invent an animal for a new habitat and name its adaptations.

3 WORD HUNT: SOLVED

12 columns, 8 rows

T	S	P	A	O	A	H	H	C	V	Y	R
T	C	T	H	A	B	I	T	A	T	A	E
S	A	E	I	M	U	N	R	M	J	X	S
A	C	S	P	I	N	E	S	E	H	B	U
O	T	E	F	L	A	N	O	L	Y	B	R
R	U	S	A	N	D	Z	T	V	I	P	T
W	S	I	T	O	M	I	G	R	A	T	E
T	R	L	F	E	E	A	F	U	R	A	E

- **CAMEL: down, row 1, column 9**
- **CACTUS: down, row 2, column 2**
- **MIGRATE: across, row 7, column 6**
- **HABITAT: across, row 2, column 4**
- **FUR: across, row 8, column 8**
- **FAT: down, row 5, column 4**
- **SAND: across, row 6, column 3**
- **SPINES: across, row 4, column 3**

4 SPEAK: SAMPLE ANSWERS

Accept any correct answer in the child's own words

1. What is an adaptation?
An adaptation is a special feature that helps a living thing survive.

2. How does a polar bear stay warm?
A polar bear has thick fur and a layer of fat.

3. Why do some birds migrate?
They migrate to a warmer place for the winter.
