LITTLE WONDERS ESL

Biology Word Lab: Cells

Level B1 · about 25 minutes · the building blocks of life

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am the control centre of a cell. I am in the middle of the cell.
2. I am a thin skin around a cell. I control what goes in and out.
3. I am the green part of a plant cell. I use sunlight to make food.

2 COOL FACT: ANIMAL CELLS AND PLANT CELLS

All living things are made of **cells**. Cells are very small, so we need a microscope to see them. Most animal cells have a **nucleus**, jelly-like **cytoplasm** and a thin cell **membrane**. The nucleus is the control centre. The membrane controls what goes in and out. Plant cells also have a strong **cell wall** and green **chloroplasts**, which make food using light. Your body has trillions of cells.

cytoplasm = the jelly-like liquid inside a cell

control = to decide what happens

microscope = a tool that makes tiny things look big

trillions = millions of millions

WORD BANK

- ☐ **nucleus**
- ☐ **membrane**
- ☐ **chloroplast**
- ☐ **cell**
- ☐ **wall**
- ☐ **plant**
- ☐ **animal**
- ☐ **jelly**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What are living things made of?
2. What does the nucleus do?
3. What do plant cells have that animal cells do not have?
