LITTLE WONDERS ESL

Biology Word Lab: Food chains

Level B1 · about 25 minutes · who eats what

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am a living thing that makes my own food. Green plants are examples of me.
2. I am an animal that eats only plants. A rabbit is an example of me.
3. I am a living thing that breaks down dead plants and animals. Fungi are examples of me.

2 COOL FACT: ENERGY FROM THE SUN TO A FOX

A **food chain** shows who eats what. Every chain starts with a **producer**, which is usually a green plant, because plants make their own food from sunlight. For example, grass is eaten by a rabbit, and the rabbit is eaten by a fox. A **herbivore** eats only plants. A **carnivore** eats other animals. An **omnivore**, such as a human, eats both. When plants and animals die, **decomposers** such as fungi break down the dead bodies and return nutrients to the soil.

chain = things that follow each other in order

return = to give back

fungi = living things such as mushrooms

break down = to change into very small pieces

3 WORD HUNT

Across or down

A	G	R	A	S	S	G	D	A	R	B	P
D	E	C	O	M	P	O	S	E	R	N	R
E	O	P	L	R	P	J	H	T	S	R	O
I	S	L	A	T	A	I	L	O	Y	A	D
L	C	A	R	N	I	V	O	R	E	B	U
A	X	N	O	N	N	B	E	M	L	B	C
E	E	T	A	O	T	F	O	X	P	I	E
H	E	R	B	I	V	O	R	E	P	T	R

WORD BANK

- ☐ producer
- ☐ herbivore
- ☐ decomposer
- ☐ carnivore
- ☐ rabbit
- ☐ fox
- ☐ grass
- ☐ plant

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What is a producer?
2. What does a herbivore eat?
3. What do decomposers do?
