LITTLE WONDERS ESL

Biology Word Lab: Germs and staying healthy

Level A2 · about 25 minutes · how to stop germs

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. We are very small living things. Some of us make you ill, but many of us are helpful.
2. Wash your hands with me and water. I help to remove germs.
3. I am an injection that teaches your body to fight a serious disease.

2 COOL FACT: WASHING AWAY GERMS

Germs are tiny living things, such as **bacteria** and **viruses**, that can make us ill. You cannot see them without a microscope. They spread through the air when people cough or **sneeze**, and through dirty hands. Washing your hands with **soap** for at least 20 seconds removes many germs. Cover your mouth when you cough, and brush your teeth twice a day. A **vaccine** teaches your body to fight some serious diseases. Not all bacteria are bad: many bacteria in your gut help digestion.

ill = not well

spread = to go from one place to another

cover = to put something over

gut = the tube that food goes through in your body

WORD BANK

- ☐ bacteria
- ☐ soap
- ☐ vaccine
- ☐ germs
- ☐ virus
- ☐ cough
- ☐ sneeze
- ☐ hands

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. How do germs spread?
2. How long should we wash our hands?
3. Are all bacteria bad?
