LITTLE WONDERS ESL

Biology Word Lab: Life cycle of a butterfly

Level A2 · about 25 minutes · four stages of change

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am the first stage. A female butterfly lays me on a leaf.
2. I am a larva. I eat leaves all day and grow big.
3. I am the hard case where the pupa changes into a butterfly.

2 COOL FACT: FROM EGG TO BUTTERFLY

A butterfly has four stages in its life: **egg**, **larva**, **pupa** and **adult**. First, the female lays tiny eggs on a leaf. A **caterpillar**, or larva, hatches from each egg and eats leaves all day to grow big. Then the caterpillar becomes a pupa and forms a hard case called a **chrysalis**. Inside it, the body changes completely. After some time, an adult butterfly comes out. It dries its wings, and then it can fly.

stages = steps in a process
forms = makes
hatches = comes out of an egg
completely = in every way

3 WORD HUNT

Across or down

L	L	A	R	V	A	L	E	A	F	P	O
A	I	N	O	P	N	N	R	W	B	U	E

WORD BANK

- ☐ egg
- ☐ caterpillar
- ☐ chrysalis
- ☐ larva
- ☐ pupa
- ☐ adult
- ☐ wings
- ☐ leaf

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What are the four stages of a butterfly?
2. What does a caterpillar eat?
3. What happens inside the chrysalis?
