LITTLE WONDERS ESL

Biology Word Lab: The digestive system

Level B1 · about 25 minutes · the journey of your food

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am a bag-shaped organ. I mix food with strong acid and turn it into a thick liquid. ☐☐☐☐☐☐☐
2. I am the liquid in your mouth. I help to make food soft. ☐☐☐☐☐☐
3. I am a long, narrow tube. I take nutrients from your food into your blood. ☐☐☐☐☐☐☐☐☐

2 COOL FACT: WHAT HAPPENS TO FOOD?

Digestion breaks food into very small pieces so that your body can use it. It starts in the mouth, where your teeth chew the food and **saliva** makes it soft. The food goes down a long tube into the **stomach**. In the stomach, strong **acid** and muscles mix the food into a thick liquid. Next, the food moves into the **small intestine**, where the body takes in **nutrients**. The large intestine takes out water, and the waste leaves the body.

nutrients = the useful things in food
waste = what the body does not need
chew = to break food with your teeth
tube = a long, hollow shape

3 WORD HUNT

Across or down

S	A	L	I	V	A	A	T	N	U	A	U
T	T	A	R	R	O	O	R	P	E	L	I
O	E	C	B	E	M	T	F	O	O	D	A
M	E	I	S	P	O	D	E	R	R	P	I
A	T	D	V	E	U	D	Y	F	P	L	S
C	H	K	E	U	T	O	T	L	T	E	D
H	H	Z	E	E	H	W	A	S	T	E	O
O	I	N	T	E	S	T	I	N	E	R	A

WORD BANK

- ☐ **stomach**
- ☐ **saliva**
- ☐ **intestine**
- ☐ **mouth**
- ☐ **teeth**
- ☐ **food**
- ☐ **acid**
- ☐ **waste**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What happens to food in the mouth?
2. What does the stomach do?
3. Where does the body take in nutrients?
