LITTLE WONDERS ESL

Biology Word Lab: The five senses

Level A2 · about 25 minutes · how we know the world

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am inside your mouth. I can taste sweet, sour, salty and bitter things.
2. We carry messages from your senses to your brain. We are thin, like wires.
3. I am the black circle in the middle of your eye. I let light in.

2 COOL FACT: SENSES AND THE BRAIN

We have five **senses**: sight, hearing, smell, taste and touch. Our eyes see light. The **pupil** lets light into the eye, and the eye sends a signal to the brain. Our **ears** hear sounds. Our nose smells chemicals in the air. The **tongue** tastes sweet, sour, salty, bitter and umami. Our **skin** feels touch, heat and pain. **Nerves** carry signals from the senses to the brain, and the brain understands them.

signal = a message

chemicals = tiny substances

umami = a savoury taste, as in cheese

understands = knows what something means

WORD BANK

- ☐ **tongue**
- ☐ **nerves**
- ☐ **pupil**
- ☐ **brain**
- ☐ **skin**
- ☐ **smell**
- ☐ **taste**
- ☐ **touch**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What are the five senses?
2. What does the pupil do?
3. How do the senses send signals to the brain?
