LITTLE WONDERS ESL

Biology Word Lab: The heart and blood

Level B1 · about 25 minutes · the pump inside you

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am a muscle about the size of your fist. I pump blood around your body.
2. I am a blood vessel. I bring blood back to the organ that pumps it.
3. You can feel me with two fingers on your wrist. I beat again and again.

2 COOL FACT: A PUMP THAT NEVER RESTS

Your **heart** is a muscle, about the size of your fist. It pumps blood around your body all day and night. Blood travels in tubes called **blood vessels**. **Arteries** carry blood away from the heart, and **veins** bring blood back to the heart. Red blood cells carry **oxygen**, and white blood cells fight germs. An adult heart beats about 60 to 100 times a minute at rest. You can feel your **pulse** on your wrist.

pumps = pushes liquid along

fist = your closed hand

germs = tiny living things that can make you ill

rest = to be calm and not move

WORD BANK

- ☐ heart
- ☐ vein
- ☐ pulse
- ☐ blood
- ☐ muscle
- ☐ oxygen
- ☐ wrist
- ☐ germs

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What does the heart do?
2. What do red blood cells carry?
3. Where can you feel your pulse?
