Chemistry Word Lab: Atoms and elements

Level B1 · about 25 minutes · the tiny pieces of everything

1. ATOM. Everything is made of atoms.
2. NUCLEUS. The nucleus is the centre of an atom.
3. ELECTRON. Electrons move around the nucleus.

2 TEACHER NOTE

Keep it simple: the nucleus has protons and neutrons, and electrons move around it. Extension: ask why a normal microscope cannot show single atoms (they are far too small).
