Chemistry Word Lab: Atoms and elements

Level B1 · about 25 minutes · the tiny pieces of everything

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am so small that you cannot see me, but everything around you is made of me.
2. I am the middle part. Protons and neutrons are inside me.
3. I am a tiny particle. I move around the middle part, but I am not inside it.

2 COOL FACT: INSIDE AN ATOM

Everything is made of tiny pieces called **atoms**. An atom is so small that you cannot see it, even with a normal microscope. In the middle of an atom is the **nucleus**, which contains **protons** and **neutrons**. **Electrons** move around the nucleus. An **element** is a substance that has only one kind of atom. Gold, oxygen and iron are elements. Scientists know of 118 different elements.

tiny = very, very small

microscope = a tool that makes small things look big

contains = has something inside it

substance = a kind of material

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What is an atom?
2. What is in the nucleus of an atom?
3. Can you name two elements?
