LITTLE WONDERS ESL · ANSWER KEY

Chemistry Word Lab: States of matter

Level A2 · about 25 minutes · solid, liquid and gas

1 BRAIN TEASERS: ANSWERS

1. **SOLID**. A solid keeps its shape and its size.
2. **LIQUID**. A liquid flows, but it does not spread out to fill the whole room.
3. **STEAM**. Steam is water in its gas state.

2 TEACHER NOTE

Key idea: the substance stays the same when it changes state. Extension for fast learners: ask what happens when steam touches a cold window (it condenses back into liquid drops).
