LITTLE WONDERS ESL

Chemistry Word Lab: States of matter

Level A2 · about 25 minutes · solid, liquid and gas

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I have a fixed shape and a fixed size. You can pick me up. Ice and a stone are examples of me.
2. I can flow and take the shape of my container, but I stay the same amount. Water and milk are examples of me.
3. I am water as a gas. I rise from a boiling kettle or a hot cup of tea.

2 COOL FACT: ICE, WATER AND STEAM

Everything around us is **matter**, and matter usually comes in three states: **solid**, **liquid** and **gas**. Water is a good example. When water is very cold, it freezes into solid ice. When ice **melts**, it becomes liquid water. When we heat water until it **boils**, it changes into a gas that we call steam. The water is still the same substance, but its particles move in a different way in each state.

particles = very small pieces of something

substance = a kind of material, for example water

freezes = changes from liquid to solid

melts = changes from solid to liquid

3 WORD HUNT

Across or down

M	L	W	A	Y	A	O	R	D	P	X	G
E	L	I	Q	U	I	D	E	C	E	P	A
L	I	C	E	T	A	S	I	T	J	R	S
T	M	T	D	T	R	T	P	R	I	R	A
E	R	M	A	T	T	E	R	R	R	B	E
Y	R	I	I	A	M	A	M	S	Q	O	C
E	Z	P	E	X	M	M	S	O	L	I	D
G	O	E	I	S	A	R	N	O	E	L	O

WORD BANK

- ☐ **solid**
- ☐ **liquid**
- ☐ **steam**
- ☐ **matter**
- ☐ **gas**
- ☐ **melt**
- ☐ **boil**
- ☐ **ice**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What are the three states of matter?
2. What happens to ice when it gets warm?
3. Where can you see steam at home?
