LITTLE WONDERS ESL

Geography Word Lab: Mountains

Level B1 · about 25 minutes · high places on Earth

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am the highest point of a mountain. ☐☐☐☐☐☐
2. I am a group of mountains in a line. ☐☐☐☐☐
3. I am the highest mountain on Earth above sea level. I am in the Himalayas. ☐☐☐☐☐☐☐

2 COOL FACT: CLIMBING HIGH

A **mountain** is a very high piece of land with steep sides. A group of mountains is called a **range**. Many ranges form where tectonic plates push together. The **Himalayas** in Asia are an example. They include Mount **Everest**, the highest mountain above sea level, at 8,849 metres. As you go higher, the air becomes colder and thinner, so there is less **oxygen**. The top of a mountain is called the **summit**. Tall mountains often have snow at the summit all year.

steep = going up or down very quickly

thinner = with less in the same space

metres = units of length

push together = move towards each other

3 WORD HUNT

Across or down

P	S	A	P	A	G	H	R	E	H	O	Y
R	N	Z	E	J	K	P	A	V	W	H	V
R	O	O	X	Y	G	E	N	E	C	A	C
G	W	S	T	E	E	P	G	R	S	V	L

WORD BANK

- ☐ **summit**
- ☐ **range**
- ☐ **Everest**
- ☐ **steep**
- ☐ **snow**
- ☐ **oxygen**
- ☐ **plates**
- ☐ **cold**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What is a range?
2. Which is the highest mountain above sea level?
3. Why is it hard to breathe on a very high mountain?
