LITTLE WONDERS ESL · ANSWER KEY

Geography Word Lab: The water cycle

Level A2 · about 25 minutes · how water travels around Earth

1 BRAIN TEASERS: ANSWERS

1. EVAPORATE. Heat makes water evaporate.
2. CONDENSE. Vapour condenses when it cools.
3. CLOUD. Clouds form from condensed water vapour.

2 TEACHER NOTE

Draw the cycle on the board as a circle with arrows. Students label evaporation, condensation, rain and flow.

3 WORD HUNT: SOLVED

12 columns, 8 rows

I	U	C	M	E	G	R	A	I	F	C	L
L	A	G	A	W	U	S	G	Z	O	O	L
I	U	I	T	E	F	Z	R	S	C	N	T
R	E	V	A	P	O	R	A	T	E	D	S
I	S	I	C	L	O	U	D	W	A	E	N
V	A	P	O	U	R	S	G	A	N	N	O
E	O	F	E	O	C	Y	U	R	D	S	W
R	A	I	N	R	D	I	O	E	C	E	O

- **EVAPORATE: across, row 4, column 2**
- **CONDENSE: down, row 1, column 11**
- **CLOUD: across, row 5, column 4**
- **VAPOUR: across, row 6, column 1**
- **RAIN: across, row 8, column 1**
- **SNOW: down, row 4, column 12**
- **RIVER: down, row 4, column 1**
- **OCEAN: down, row 2, column 10**

4 SPEAK: SAMPLE ANSWERS

Accept any correct answer in the child's own words

1. What does the Sun do to the water in the ocean?
The Sun heats the water and it evaporates.

2. How do clouds form?
Water vapour cools and condenses into tiny drops.

3. What happens to the rain after it falls?
The water flows into streams and rivers, and then back to the ocean.
