# Geography Word Lab: Volcanoes

**Level B1** · about 25 minutes · fire from inside Earth

## 1 BRAIN TEASERS: ANSWERS

1. MAGMA. Magma is melted rock under the ground.
2. LAVA. Magma that reaches the surface is called lava.
3. CRATER. The crater is at the top of a volcano.

## 2 TEACHER NOTE

Extension: the Ring of Fire has many volcanoes and earthquakes. Students can find it on a map around the Pacific Ocean.

## 3 WORD HUNT: SOLVED

12 columns, 8 rows

| T | P | K | O | S | V | N | B | E | Y | E | E |
|---|---|---|---|---|---|---|---|---|---|---|---|
| E | R | U | P | T | O | K | P | E | W | C | G |
| E | L | U | L | B | L | E | J | N | A | D | T |
| S | A | S | A | L | C | R | A | T | E | R | T |

- **MAGMA: across, row 5, column 5**
- **LAVA: down, row 3, column 2**
- **CRATER: across, row 4, column 6**
- **VOLCANO: down, row 1, column 6**
- **ERUPT: across, row 2, column 1**
- **ASH: across, row 7, column 9**
- **CRUST: across, row 8, column 5**
- **PLATES: down, row 2, column 4**

## 4 SPEAK: SAMPLE ANSWERS

Accept any correct answer in the child's own words

**1. What is the difference between magma and lava?**
Magma is under the ground, and lava is on the surface.

**2. What can an eruption send into the air?**
An eruption sends ash, gas and rocks into the air.

**3. Where do many volcanoes form?**
Many volcanoes form where tectonic plates meet.
