LITTLE WONDERS ESL

Geography Word Lab: Weather and climate

Level B1 · about 25 minutes · today and over many years

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am what the air is like outside today: sunny, rainy, windy or cold.
2. I am the usual conditions in a place over many years. The Sahara has a hot, dry one of me.
3. I tell you what the air will probably be like tomorrow. You can hear me on the radio or see me on your phone.

2 COOL FACT: WEATHER OR CLIMATE?

Weather is what the air is like outside today: sunny, rainy, windy or cold. **Climate** is the usual weather in a place over many years. For example, the Sahara has a hot, dry climate, but sometimes the weather there is cloudy. Meteorologists use a **thermometer** to measure temperature, a rain gauge to measure rain and an anemometer to measure the speed of **wind**. Satellites take pictures of **clouds** from space. A **forecast** tells us what the weather will probably be tomorrow.

meteorologist = a scientist who studies the weather

satellite = a machine that moves around Earth in space

gauge = a tool that measures something

probably = most likely

WORD BANK

- ☐ weather
- ☐ climate
- ☐ forecast
- ☐ wind
- ☐ cloud
- ☐ rain
- ☐ sunny
- ☐ dry

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What is the difference between weather and climate?
2. What is the climate of the Sahara?
3. What does a forecast tell us?
