LITTLE WONDERS ESL

Science Word Lab: Energy

Level B1 · about 25 minutes · forms of energy and where it comes from

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am the ability to make things happen. I can move, heat or light things.
2. I am the kind of power that comes from the Sun. Panels on roofs can catch me.
3. Coal, oil and gas are examples of me. We burn me to make heat and power.

2 COOL FACT: WHERE DOES ENERGY COME FROM?

Energy is the ability to make things happen. We cannot make or destroy energy, but we can change it from one form to another. A **lamp** changes electrical energy into light and heat. Your body changes the energy in food into movement. The Sun is the main source of energy for Earth. **Solar panels** and **wind** turbines give us **renewable** energy, which does not run out. Coal, oil and gas are **fossil fuels**, and they will run out one day.

destroy = to end something completely

source = the place something comes from

renewable = does not run out

run out = to be all used up

WORD BANK

- ☐ energy
- ☐ solar
- ☐ fuel
- ☐ lamp
- ☐ wind
- ☐ heat
- ☐ food
- ☐ light

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What is energy?
2. What does a lamp do with electrical energy?
3. Why is wind energy renewable?
