LITTLE WONDERS ESL

Science Word Lab: Forces and gravity

Level A2 · about 25 minutes · pushes, pulls and falling things

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am a push or a pull. I can start an object moving or stop it.
2. I pull everything towards the ground. When you drop a ball, I make it fall.
3. I slow moving things down when they rub against each other. Rough ground has a lot of me.

2 COOL FACT: WHY DO THINGS FALL?

A **force** is a **push** or a **pull**. Forces can start an object moving, stop it or change its direction. **Gravity** is a force that pulls objects towards each other. The gravity of Earth pulls everything down towards the ground, so when you drop a ball, it falls. **Friction** is a force that slows moving objects when they rub against each other. Your **weight** is the pull of gravity on your body. On the Moon, gravity is weaker, so you would weigh less.

direction = the way something goes

rub = to move one thing against another

weaker = not as strong

weigh = to be heavy by a certain amount

Across or down

E	B	P	H	E	S	H	S	O	N	A	E
L	A	L	G	P	S	M	T	M	P	C	T
B	L	E	R	U	W	E	I	G	H	T	K
P	L	U	A	L	C	A	F	O	R	C	E
U	T	E	V	L	R	I	H	E	E	M	H
S	R	N	I	F	R	I	C	T	I	O	N
H	M	R	T	E	N	F	H	T	T	O	T
L	H	E	Y	M	H	E	D	I	U	N	E

WORD BANK

- ☐ force
- ☐ gravity
- ☐ friction
- ☐ push
- ☐ pull
- ☐ weight
- ☐ Moon
- ☐ ball

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What is a force?
2. What happens when you drop a ball?
3. Why would you weigh less on the Moon?
