LITTLE WONDERS ESL

Science Word Lab: Heat and temperature

Level B1 · about 25 minutes · how heat moves

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. You put me in your mouth or under your arm to find out if you have a fever.
2. Heat from the Sun reaches us through empty space by this.
3. I am the scale where water freezes at 0 and boils at 100 degrees.

2 COOL FACT: HOT, WARM AND COLD

Heat is energy that moves from a hot object to a cooler object. **Temperature** tells us how hot or cold something is. We measure it with a **thermometer** in degrees **Celsius**. At normal air pressure, water freezes at 0 degrees and boils at 100 degrees. Heat moves in three ways. In **conduction**, heat moves through a solid, so a metal spoon in hot soup gets hot. In convection, hot air or liquid rises. In **radiation**, heat from the Sun reaches us through space.

object = a thing

pressure = the force of the air on things

rises = goes up

normal = usual

3 WORD HUNT

Across or down

C	R	A	D	I	A	T	I	O	N	U	A
E	H	Y	F	D	O	H	W	T	P	T	P
L	L	O	P	T	Y	E	I	I	I	S	A
S	N	T	M	E	T	A	L	R	C	P	A
I	T	K	A	R	D	T	T	L	N	O	O
U	L	E	U	A	S	O	U	P	E	O	E
S	C	O	N	D	U	C	T	I	O	N	O
T	H	E	R	M	O	M	E	T	E	R	T

WORD BANK

- ☐ **thermometer**
- ☐ **radiation**
- ☐ **Celsius**
- ☐ **conduction**
- ☐ **heat**
- ☐ **spoon**
- ☐ **metal**
- ☐ **soup**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. What is a thermometer for?
2. At what temperature does water boil?
3. Why does a metal spoon in hot soup get hot?
