Science Word Lab: Light and shadows

Level B1 · about 25 minutes · how light travels

1 BRAIN TEASERS: ANSWERS

1. **SHADOW**. A shadow forms when an object blocks light.
2. **OPAQUE**. Opaque materials block all light.
3. **TRANSPARENT**. Transparent materials let light through.

2 TEACHER NOTE

Extension: translucent materials, such as tracing paper, let some light through. A torch and a few objects make a quick demonstration.

3 WORD HUNT: SOLVED

12 columns, 8 rows

Y	H	S	A	R	C	S	S	N	D	A	Y
I	T	R	A	N	S	P	A	R	E	N	T
W	O	L	I	D	H	O	G	X	O	O	O
O	M	I	D	D	A	Y	L	T	L	P	P
O	Q	T	A	L	D	P	A	E	I	I	A
D	E	T	R	T	O	D	S	N	G	U	Q
D	S	N	R	D	W	O	S	M	H	E	U
S	T	R	A	I	G	H	T	O	T	D	E

- **SHADOW: down, row 2, column 6**
- **OPAQUE: down, row 3, column 12**
- **TRANSPARENT: across, row 2, column 2**
- **LIGHT: down, row 4, column 10**
- **GLASS: down, row 3, column 8**
- **WOOD: down, row 3, column 1**
- **STRAIGHT: across, row 8, column 1**
- **MIDDAY: across, row 4, column 2**

4 SPEAK: SAMPLE ANSWERS

Accept any correct answer in the child's own words

1. How does light travel?
Light travels in straight lines.

2. What is the difference between transparent and opaque?
Light passes through a transparent material, but not through an opaque one.

3. When are shadows short?
Shadows are short at midday.
