LITTLE WONDERS ESL

Science Word Lab: Light and shadows

Level B1 · about 25 minutes · how light travels

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am dark. I appear on the ground when something blocks the light from the Sun. ☐☐☐☐☐☐
2. Light cannot pass through me. Wood and metal are examples of me. ☐☐☐☐☐☐
3. Light passes through me easily, so you can see clearly through me. Clear glass is an example. ☐☐☐☐☐☐☐☐☐☐☐☐

2 COOL FACT: LIGHT AND DARKNESS

Light travels in **straight lines**. It is very fast: it travels about 300,000 kilometres every second. Some materials are **transparent**, so light passes through them, like clear glass. Other materials are **opaque**, so no light passes through them, like wood. When an opaque object blocks the light, it makes a **shadow**. Shadows are long in the morning and in the evening, and they are short at **midday**, when the Sun is high in the sky.

kilometres = a unit for long distances

blocks = stops something from passing

materials = the things that objects are made of

midday = twelve o'clock in the day

3 WORD HUNT

Across or down

Y	H	S	A	R	C	S	S	N	D	A	Y
I	T	R	A	N	S	P	A	R	E	N	T
W	O	L	I	D	H	O	G	X	O	O	O
O	M	I	D	D	A	Y	L	T	L	P	P
O	Q	T	A	L	D	P	A	E	I	I	A
D	E	T	R	T	O	D	S	N	G	U	Q
D	S	N	R	D	W	O	S	M	H	E	U
S	T	R	A	I	G	H	T	O	T	D	E

WORD BANK

- ☐ **shadow**
- ☐ **opaque**
- ☐ **transparent**
- ☐ **light**
- ☐ **glass**
- ☐ **wood**
- ☐ **straight**
- ☐ **midday**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. How does light travel?
2. What is the difference between transparent and opaque?
3. When are shadows short?
