LITTLE WONDERS ESL

Science Word Lab: Sound and vibrations

Level B1 · about 25 minutes · how we hear

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am a quick back-and-forth movement. A guitar string does me when you pluck it.
2. I tell you how high or low a sound is. A whistle has a high one of me.
3. I tell you how loud a sound is. You can turn me up on a radio.

2 COOL FACT: HOW DOES SOUND TRAVEL?

Sound is made by **vibrations**. When you pluck a guitar string, it vibrates and shakes the air around it. The shaking travels as **sound waves** to your ear. Sound needs something to travel through, such as air, water or metal. In **space** there is no air, so there is no sound. **Pitch** is how high or low a sound is. Fast vibrations make a high pitch. **Volume** is how loud a sound is, and we measure it in **decibels**.

vibrates = moves quickly backwards and forwards

pluck = to pull a string and let it go

measure = to find the size or amount of something

decibels = the units for the volume of sound

Across or down

E	S	E	A	F	G	U	I	T	A	R	S
U	N	P	F	H	V	R	S	O	U	N	D
M	T	N	R	E	S	E	R	V	R	T	S
P	V	I	B	R	A	T	I	O	N	A	P
I	S	T	R	I	N	G	W	L	A	W	A
T	N	R	A	J	J	F	T	U	H	A	C
C	T	D	I	B	T	T	S	M	T	V	E
H	T	E	A	Y	M	A	L	E	H	E	R

WORD BANK

- ☐ **vibration**
- ☐ **pitch**
- ☐ **volume**
- ☐ **sound**
- ☐ **guitar**
- ☐ **string**
- ☐ **wave**
- ☐ **space**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. How is sound made?
2. Why is there no sound in space?
3. What is pitch?
