LITTLE WONDERS ESL

Science Word Lab: The Solar System

Level A2 · about 25 minutes · the Sun and its planets

1 BRAIN TEASERS

Read the clue. Write the English word in the boxes.

1. I am the star in the middle of the Solar System. I give Earth light and heat.
2. This is the path that a planet makes when it moves around a star.
3. I am a big planet with bright rings. In order from the middle of the Solar System, I am number six.

2 COOL FACT: EIGHT PLANETS, ONE STAR

Our Solar System has one star, the **Sun**, and eight **planets**. The four inner planets, Mercury, Venus, Earth and Mars, are small and **rocky**. The four outer planets, **Jupiter**, **Saturn**, Uranus and Neptune, are much bigger. Jupiter is the largest planet. Saturn has bright rings. Earth is the only planet that we know has life. A planet moves around the Sun on a path called an **orbit**. Earth takes one year to make one orbit.

star = a huge ball of hot gas that makes light

rocky = made of rock

largest = the biggest

path = the line that something follows

WORD BANK

- ☐ **Sun**
- ☐ **orbit**
- ☐ **Saturn**
- ☐ **planet**
- ☐ **Jupiter**
- ☐ **Mars**
- ☐ **rocky**
- ☐ **Earth**

4 SPEAK

Tell your teacher in your own words (about 1 minute)

1. How many planets are there in the Solar System?
2. Which planet is the largest?
3. How long does Earth take to orbit the Sun?
